

# What is AllyMD?

AllyMD is a novel way of medical practice. We bring care to the patient, wherever they are, without the need to visit the physician's office. Our advanced care-technology allows for real-time physician-patient interaction, via web and mobile devices. In addition, we have added 1000+ medical contents for patients to manage their medical conditions.

## AllyMD Services

### TELE VITAL

**Do you have a chronic condition? Let AllyMD physician monitor your vitals.**

For chronic patients, it is important to maintain a log of vitals and report it to the physician on a regular basis. TeleVital service automates this process and enables physician to remotely monitor any deviation from target values and proactively help prevent patient's condition from getting worse or from having to go to the hospital when it is not necessary.

### TELE TRIAGE

**Report symptoms and get care advice from AllyMD physician online.**

Patient can report over 150 different symptoms and conditions using AllyMD physician approved questionnaire. Whether at work or on vacation or at home – patient receives care advice and first aid information online and on their mobile device. Triage service allows physician to assess symptoms and health condition remotely with complete access to patient's medical record.

### VIDEO TRIAGE

**Present symptoms in a free format by following simple onscreen video instructions**

AllyMD patients have the option to report symptoms using state-of-the-art Video Triage system. Video Triage service allows physician to see the patient, assess symptoms, check health risks and condition, and provide proper care – all, as far as possible, without requiring an office visit (for routine consultation and follow-ups).

## HEART ATTACK ALERT

### Having Chest Pain? Could it be a heart attack?

Patients can check their chest pain symptoms using physician approved questionnaire and send alerts to physician, family members and nearby hospitals using the state-of-the-art Heart Attack Alert App. Heart Attack Alert allows physician and hospital to be ready with diagnosis and treatment upon arrival.

## STROKE ALERT

### Trouble walking, speaking or understanding, or feeling numbness?

At the first instance of any Stroke related symptom, AllyMD patients can send alert from their mobile devices to their family, physician and nearby hospital. Stroke Alert allows physician and hospital to be ready with diagnosis and treatment upon arrival.

## HEALTH EVALUATION

### Receive regular updates on health and wellness.

AllyMD patient receives periodic health evaluation from their physician. This evaluation is designed to deliver personalized preventive strategies to reduce any long-term risk and improve or maintain short-term health condition.

## GROUP DISCUSSION

### Invite family to participate in patient care.

At AllyMD, patients can invite their family to participate in the discussions with their physician. This allows physicians to coordinate and manage the medical care delivered to the patient efficiently.

## EDUCATION AND COUNSELING

### Learn from physician on how to live healthy.

AllyMD patients can learn from their physician and other participants with similar clinical conditions on how to mitigate risk and improve their quality of life. Additionally, patients also get round-the-clock access to physician approved medical podcasts and instructions.

## CONSULTING AND SECOND OPINION

### Get second opinion or consultations online.

At AllyMD, patients can get follow-up consultation or second opinion on their test results without having to visit their physician's office. Physician can review primary opinion of a specialist and review progress through follow-up evaluation questionnaire and vitals monitoring.

## ONLINE APPOINTMENT SCHEDULING

### Request appointments online.

AllyMD patients can request appointment online, including mobile devices, by giving their choice of preferred date and time. All forms, documents, findings, instructions, follow-ups and referrals are made available online to the patient for up to 7-years by virtue of this service.
